Bilingual Learners and Social Equity Ruth Harman 2017-08-13 This volume explores how educators conceptualized and implemented critical approaches to systemic functional linguistics that support bilingual students in appropriating and challenging dominant knowledge domains in K-16 contexts. The researchers exhibit a shared commitment to enacting a culturally sustaining SFL praxis that validates multilingual

meaning making, pushes against social inequity, and fosters creative re-mixing of available semiotic resources. It should prove a valuable resource for students, teachers and researchers interested in applied linguistics, education and critical theory.

They offer guidance for how educators can use the pandemic to pursue a more justice-oriented, critical examination of contemporary society"-

The Oxford Handbook of Assessment Policy and Practice in

Music Education Timothy S. Brophy 2019-01-02 In the music classroom, instructors who hope to receive aid are required to provide data on their classroom programs.

Due to the lack of reliable, valid large-scale assessments of student achievement in music, however, music educators in schools that accept funds face a considerable challenge in finding a way to measure student learning in their classrooms. From Australia to Taiwan to the Netherlands, music teachers experience similar struggles in the quest for a definitive assessment resource that can be used by both music educators and researchers. In this two-volume Handbook, contributors from across the globe come together to provide an authority on the assessment, measurement, and evaluation of student learning in music. The Handbook's first volume emphasizes international and theoretical perspectives on music education assessment in the major world regions. This volume also looks at technical aspects of measurement in music, and outlines situations where theoretical foundations can be applied to the development of tests in music. The Handbook's second volume offers a series of practical and US-focused approaches to music education assessment. Chapters address assessment in different types of US classrooms; how to assess specific skills or requirements; and how assessment can be used in tertiary and music teacher education classrooms. Together, both volumes of The Oxford Handbook of Assessment in Music Education pave the way forward for music educators and researchers in the field.

Setting the Standard for Project Based Learning John

Larmer 2015-05-26 Project based learning (PBL) is gaining renewed attention with the current focus on college and career readiness and the performance-based emphases of Common Core State Standards, but only high-quality versions can deliver the beneficial outcomes that schools want for their students. It's not enough to just "do projects." Today's projects need to be rigorous, engaging, and in-depth, and they need to have student voice and choice built in. Such projects require careful planning and pedagogical skill. The authors—leaders at the respected Buck Institute for Education—take readers through the step-by-step process of how to create, implement, and assess PBL using a classroom-tested framework. Also included are chapters for school leaders on implementing PBL systemwide and the use of PBL in informal settings. Examples from all grade levels and content areas provide evidence of the powerful effects that PBL can have, including * increased student motivation and preparation for college, careers, and citizenship; * better results on high-stakes tests; * a more satisfying teaching experience; and * new ways for educators to communicate with parents, communities, and the wider world. By successfully implementing PBL, teachers can not only help students meet standards but also greatly improve their instruction and make school a more meaningful place for learning. Both practical and inspirational,

this book is an essential guide to creating classrooms and schools where students—and teachers—excel.

Assessing Student Outcomes - Why, Who, What, How J.

Fredericks Volkwein 2011-11-22 This volume offers administrators and practitioners a summary guide to assessment in higher education, from the reasons for undertaking assessment to the delivery of findings. It opens with the questions that precede an effective study and drive research design: To what extent is the study aimed at educational improvement, and to what extent is it aimed at external accountability? Are the results expected to demonstrate goal attainment, improvement, comparison to others, meeting standards, cost-effective investment? What is the population from whom assessment data are being collected: Are we measuring the knowledge and skills of individuals and making decisions about their remediation, certification, or development? Or are we sampling from particular groups of students and comparing them to each other, or perhaps to themselves over time? The core of the volume is devoted to the objects of assessment: basic skills, general education knowledge, attainment in the major, personal growth, attitudes and satisfaction, and alumni outcomes, keeping in mind both cognitive and noncognitive measures. One chapter describes common obstacles to effective assessment; others describe conceptual models, research methods, and data collection strategies and instruments. The concluding chapter underscores the importance of communicating research results effectively. This is a special volume of the Jossey-Bass higher education quarterly report series New Directions for Institutional Research. Always timely and comprehensive, New Directions for Institutional Research provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination, information analysis, program evaluation, and institutional management.
