Shiver Karen Robards 2013-01-17 When she swore off love, he was the last man she imagined would steal her heart. If driving a tow truck through the seediest part of town with a gun beside her means putting a roof over her son's head, then single mother Samantha is going to be the best repossession woman on the books. But when she hooks her truck up to a flashy BMW, the last thing she expects is to find a beaten, bloody man in the trunk - or to be catapulted into a terrifying fight to survive. Daniel knows the drug runners who kidnapped him from protective custody will stop at nothing to see him dead. With his life on the line, his only option is to take his pretty saviour hostage and force her to help him. Sam and her four-year-old son are in too deep. With ruthless killers on their trail, she must reluctantly trust this handsome, menacing stranger. And as Sam relinquishes control, she feels an unmistakable desire. But what is the price of falling for a man who

operates on the edge of danger - her heart, her life . . . or both?

Duty to Investigate J.W. Stone 2013-06-20 As a successful trial lawyer, Mike Beck uses his personality and his skill with the letter of the law to win in a courtroom. As a Marine Reservist ordered to Iraq on an unexpected deployment, he finds himself in a different world where the law of war often conflicts with common sense and his own feel for what's right and what's wrong. When an embedded female correspondent reveals what appears to be an illegal killing of Iraqi civilians by a U.S. Marine during the battle for Fallujah, Beck finds himself faced with a case that challenges both his legal skills and his conviction that something is very wrong with what seems to be a clear violation of the law of land warfare. Devoted to finding the truth about an ugly incident and keeping an innocent Marine from being convicted in a court-martial, Mike Beck defies orders, purloins evidence, and leads a combat team that must

fight their way through a fanatical enemy force to investigate the scene of the alleged crime. Along the way as he battles his conscience, command influence, and a media giant clamoring for his head, Mike Beck finds a lot of truth about the case, about the brutal enemy in Iraq, about the nature of a very nasty war, about the Marines risking their lives in a confusing combat situation—and about himself as a Marine, a lawyer, and a man. “A timely page-turner about war, honor, love, and Iraq justice told by a true Marine—Hooah!” Eugene Sullivan, Chief Judge (ret), U.S. Court of Appeals (Armed Forces) Author of *The Majority Rules* and *The Report to the Judiciary* Stone, a former Marine himself, blurs the lines between the good guys and the bad guys and shows us that in war, not everything and everyone is as they seem at first glance. His battle scenes are written from the perspective of a true soldier and are gripping and at times heart-breaking. Stone's story is intriguing, action-packed—and hints at more to

come.

23 Lügen, die sie uns über den Kapitalismus

erzählen Ha-Joon Chang 2010-10-04

Provokantes Debattenbuch über den Kapitalismus vor dem Hintergrund der aktuellen Weltwirtschaftskrise Mit seiner provokanten Streitschrift macht Ha-Joon Chang Front gegen die heiligen Kühe des Kapitalismus. In dreiundzwanzig Thesen und Gegenthesen analysiert er die Grundzüge der Marktwirtschaft des 21. Jahrhunderts, sagt, was sie ist und was sie nicht ist, was sie kann und was sie nicht kann. Dabei verbindet er ökonomischen Sachverstand mit gesellschaftlichem Scharfblick und Menschenkenntnis. Knapp, präzise und streitbar bietet Ha-Joon Chang dem Leser das Rüstzeug, die herrschenden Illusionen einer kapitalistischen Ökonomie zu durchschauen, ihre Möglichkeiten realistisch einzuschätzen und

zum Wohle aller zu nutzen. Stellt elementare Lehrmeinungen der freien Marktwirtschaft in Frage.

Managing Growth in America's

Communities Douglas R. Porter 2008 In this thoroughly revised edition of *Managing Growth in America's Communities*, readers will learn the principles that guide intelligent planning for communities of any size, grasp the major issues in successfully managing growth, and discover

what has actually worked in practice (and where and why). This clearly written book details how American communities have grappled with the challenges of planning for growth and the ways in which they are adapting new ideas about urban design, green building, and conservation. It describes the policies and programs they have implemented, and includes examples from towns and cities throughout the U.S. "Growth management" is essential today, as communities seek to control the location, impact, character and timing of development in order to balance environmental and economic needs and concerns. *Managing Growth in America's Communities* addresses all of the key considerations: Establishing public roles in community development; Determining locations and character of future development; Protecting environmental and natural resources; Managing infrastructure development; Preserving community character and quality; Achieving economic and social goals; Respecting property

rights concerns. The author, who is one of the nation's leading authorities on managing community growth, provides examples from dozens of communities across the country, as well as state and regional approaches. Brief profiles present overviews of specific problems addressed, techniques utilized, results achieved, and contact information for further research. Informative sidebars offer additional perspectives from experts in growth management, including Robert Lang, Arthur C. Nelson, Erik Meyers, and others. This new edition has been completely updated by the author. In particular, he considers issues of population growth, eminent domain, and the importance of design, especially "green" design. He also reports on the latest ideas in sustainable development, "smart growth," neighborhood design, transit-oriented development, and green infrastructure planning. Like its predecessor, the second edition of *Managing Growth in America's Communities* is essential reading for anyone who

is interested in how communities can grow intelligently.
