[The Child Advocacy Handbook](#) Happy Craven Fernandez 1980 Explores children's rights and provides a resource guide for individuals interested in fostering services for children and working toward preventing such problems as child abuse and teenage suicide  
[Child Abuse and Neglect](#) Wendy Stainton Rogers 1992 Written in non-jargon terms for the concerned general reader, this seeks to cover all aspects of the child abuse issue, with contributions from lawyers, psychiatrists, social workers and others involved. It includes first-hand accounts of abusers and abuse survivors and offers advice on therapy and self-help systems. This book includes updated information on implementation of The Children's Act of 1989 and is a core text for an Open University course.

*Last Child in the Woods* Richard Louv 2006-03-17 "I like to play indoors better 'cause that's where all the electrical outlets are," reports a fourth-grader. Never before in history have children been so plugged in—and so out of touch with the natural world. In this groundbreaking new work, child advocacy expert Richard Louv directly links the lack of nature in the lives of today's wired generation—he calls it nature deficit—to some of the most disturbing childhood trends, such as rises in obesity, Attention Deficit Disorder (ADD), and depression. Some startling facts: By the 1990s the radius around the home where children were allowed to roam on their own had shrunk to a ninth of what it had been in 1970. Today, average eight-year-olds are better able to identify cartoon characters than native species, such as beetles and oak trees, in their own community. The rate at which doctors prescribe antidepressants to children has doubled in the last five years, and recent studies show that too much computer use spells trouble for the developing mind. Nature-deficit disorder is not a medical condition; it is a description of the human costs of alienation from nature. This alienation damages children and shapes adults, families, and communities. There are solutions, though, and they're right in our own backyards. Last child in the Woods is the first book to bring together cutting-edge research showing that direct exposure to nature is essential for healthy childhood development—physical, emotional, and spiritual. What's more, nature is a potent therapy for depression, obesity, and ADD. Environment-based education dramatically improves standardized test scores and grade point averages and develops skills in problem solving, critical thinking, and decision making. Even creativity is stimulated by childhood experiences in nature. Yet sending kids outside to play is increasingly difficult. Computers, television, and video games compete for their time, of course, but it's also our fears of traffic, strangers, even virus-carrying mosquitoes—fears the media exploit—that keep children indoors. Meanwhile, schools assign more and more homework, and there is less and less access to natural areas. Parents have the power to ensure that their daughter or son will not be the "last child in the woods," and this book is the first step toward that nature-child reunion.

*Creative Child Advocacy* Kumari V. 2004 This volume is a collection of original essays written by prominent child advocates, law teachers, social workers, activists and professionals from across the globe. The focus is not simply on describing challenging situations or the un-met needs of children in specific countries, but also to offer examples of positive solutions and successful initiatives on behalf of children and youth. The projects described in the book are drawn from Asia (India, Pakistan and China), Europe (England and Poland), North America (the USA), THE Middle East (Israel) and Africa (Kenya).  
*Creative Child Advocacy* Ved Kumari 2004-08-30 `Combining global examples of cases with practical solutions, this book will be of interest to anyone involved in child advocacy, from judges to probation officers' - childRIGHT `The greatest achievement of this book may be its inspiration to those also willing to "swim against the tide" as child advocates... The authors are open about the practicalities of their work and the tensions they have experienced... their personal accounts contain gripping narratives of real attempts to improve situations for children' - Adoption & Fostering This collection of original articles by an international team of contributors addresses a wide range of issues affecting children and youth such as: child labour; international child custody abduction; juvenile delinquency; child abuse and neglect; and date violence among teenagers. The innovative approaches proposed by the contributors to deal with these concerns include: creating a child advocacy centre within a private firm; litigation strategies; and developing a handbook that explains courts processes to abused children.

**Participatory Methodologies to Elevate Children's Voice and Agency** Ilene R. Berson 2019-03-01 This volume of the Research in Global Child Advocacy Series explores participatory methodologies and tools that involve children in research. Perspectives on the role of children have transitioned from viewing children as objects of research, to children as subjects of research, to acknowledgement of children as competent contributors and agents throughout the inquiry process. Researchers continue to explore approaches that honor the capacity of children, drawing on diverse methodologies to elevate children’s voices and actively engage them in the production of knowledge. Nonetheless, despite these developments, questions over the extent to which children can be free of adult filters and influence merits sustained scholarly attention. The book includes chapters that critically examine methodological approaches that empower children in the research process. Contributions include empirical or practitioner pieces that operate from an empowerment paradigm and demonstrate the agenic capacity of children to contribute their perspectives and voices to our understanding of childhood and children’s lives. The text also features conceptual pieces that challenge existing theoretical frameworks, critique research paradigms, and analyze dilemmas or tensions related to ethics, policy and power relations in the research process.

[Ending Child Abuse](#) Victor I. Vieth 2014-03-18 Get the tools to coordinate a plan in your community! The highly anticipated Ending Child Abuse: New Efforts in Prevention, Investigation, and Training presents an exciting vision: to end or significantly reduce child abuse. Respected social scientists and legal scholars discuss empirically sound short- and long- term multidisciplinary strategies that can be implemented in our society. Innovative and well-established concepts and approaches are clearly presented, such as specialized education, rational preventative methods, effective investigation and prosecution strategies, and the analysis of factors that influence law enforcement investigations and child abuse prevention efforts. Several obstacles stand in the way of the elimination of child abuse, such as the failure to investigate most child abuse reports, inadequate training of frontline child protection professionals, lack of financial resources, and the dilemma that child abuse is not addressed at the youngest ages. Ending Child Abuse: New Efforts in Prevention, Investigation, and Training tackles these problems and others with practical guidelines and aggressive creative strategies that can be applied to every community in the United States. This collection is impeccably referenced and soundly supported with research. Ending Child Abuse: New Efforts in Prevention, Investigation, and Training discusses: implementation of a model curriculum in child advocacy for undergraduate and graduate institutions forensic interview training extensive education of the nation’s child protection professionals development and funding of prevention programs at the

community level educational reforms of Montclair State University in New Jersey designed to better prepare professionals who advocate for children research-based interview techniques with best practice guidelines possible broader social and system-level reforms vertical prosecution of child abuse cases—with a model for its operation Ending Child Abuse: New Efforts in Prevention, Investigation, and Training is an ambitious eye-opening source perfect for social services professionals, mental health professionals, practitioners, researchers, educators, students, and medical and legal professionals who deal with child abuse and children’s welfare.

[A Vocabulary of Images](#) Berenice Nyland 2020 In this volume we trace the history of the Child Art in Australia. Through the life and work of Marianne Seemann, we follow the rise and fall of the movement. Marianne Seemann came from Vienna. She worked closely with the creator of Child Art, was a disciple of Franz Cizek (the Father of Child Art), and never deviated from his teachings. In Australia, the Children's Craft and Leisure movement started in 1922 and promoted the idea of children as naturally creative. It was therefore necessity to protect them from formal art education, lest they lose their unspoiled perception of truth and beauty. It was also a time when children of the poor and the working classes were starting to be included in artistic endeavours. There was a perception that as work practices changed there would be leisure time for all that could be gainfully employed if early education prepared children to grow their creative imagination. One hundred years later, the belief in children's innate creativity is still strong in the early childhood education canon. Many of the ideas welcomed by the progressive educationalists were exciting beliefs about the ideal of education and concepts of progress. Revisiting these ideas in a form that brings into focus the practices of those who supported the 'new education' is an opportunity to evaluate what legacies have not been acknowledged and what ideals have lost relevance for the present.

[Gender Born, Gender Made](#) Diane Ehrensaft 2011-05-17 A groundbreaking guide to caring for children who live outside binary gender boxes We are only beginning to understand gender. Is it inborn or learned? Can it be chosen—or even changed? Does it have to be one or the other? These questions may seem abstract—but for parents whose children live outside of gender “norms,” they are very real. No two children who bend the “rules” of gender do so in quite the same way. Felicia threw away her frilly dresses at age three. Sam hid his interest in dolls and “girl things” until high school—when he finally confided his desire to become Sammi. And seven-year-old Maggie, who sports a boys’ basketball uniform and a long blond braid, identifies as “a boy in the front, and a girl in the back.” But all gender-nonconforming children have one thing in common—they need support to thrive in a society that still subscribes to a binary system of gender. Dr. Diane Ehrensaft has worked with children like Felicia, Sam, and Maggie for over 30 years. In Gender Born, Gender Made, she offers parents, clinicians, and educators guidance on both the philosophical dilemmas and the practical, daily concerns of working with children who don’t fit a “typical” gender mold. She debunks outmoded approaches to gender nonconformity that may actually do children harm. And she offers a new framework for helping each child become his or her own unique, most gender-authentic person.

*High-Tech Tots* Ilene R. Berson 2010-05-01 Young children are coming of age surrounded by information and communication technology (ICT). ICT is a prominent force in their lives, and working with ICT can stimulate students intellectually, incite their creativity, and challenge them to apply developmentally appropriate inquiry approaches that enhance their learning experiences. Digital technologies also allow children to expand their physical space and access many online social environments that transcend time and space. However, any focus on the efficiency and effectiveness of technology applications in the early childhood years cannot overlook the potential consequences of technological development on children with regard to their social functioning, interpersonal interactions, and global understanding. In addition to evaluating technology as a tool of instruction, we must focus on educational implications and ethical issues associated with their use. This book is the fifth in the Research in Global Child Advocacy Series. The volume examines theoretical assumptions as well as the application of innovative strategies that optimize the interface between young children and ICT from a global perspective. Despite divergent perspectives, the chapter authors share a commitment to explore the immersion of ICT into the lives of young children and consider the educational value of these tools as well as the developmental appropriateness of technological affordances. This volume brings together scholars and policymakers whose rich discourse delves into questions such as: How do communication technologies benefit young children’s social and cognitive development? What standards and technical specifications are needed to effectively safeguard young children engaged with ICT? How are young children introduced to ICT? What are the challenges and risks for young children online? What programs are effective in mediating risk? What are the educational applications for ICT in early childhood? Is social networking the new "online playground" for young children? How can young children become competent users of digital technology and media? How can early childhood educators and families encourage positive usage and discourage negative social consequences associated with today’s technology? How can ICT enhance teaching and learning for young children? What ICT activities are developmentally

appropriate for young children? In the book there are three primary areas of emphasis: (a) ICT as a teaching and learning tool across cultures and countries to promote the social and cognitive development of young children; (b) research on developmentally appropriate education on cybersafety and cybercitizenship; and (c) studies on the influence of digital technologies on young children, including exposure to inappropriate content and participation in online social networks. This resource offers readers a glimpse into the experience of children and the expertise of researchers and professionals who diligently work toward crafting a framework for action that reflects intercultural and cross-national initiatives. Given the role that electronic media plays in the lives of children as both an educational and entertainment tool, understanding the physical and social contexts, as well as the developmental issues, is critical to programs aiming to optimize the full potential of digital tools that support and enhance the experiences of young children.

**The Gender Creative Child** Diane Ehrensaft PhD 2016-04-08 From a leading US authority on a subject more timely than ever—an up-to-date, all-in-one resource on gender-nonconforming children and adolescents In her groundbreaking first book, *Gender Born, Gender Made*, Dr. Diane Ehrensaft coined the term gender creative to describe children whose unique gender expression or sense of identity is not defined by a checkbox on their birth certificate. Now, with *The Gender Creative Child*, she returns to guide parents and professionals through the rapidly changing cultural, medical, and legal landscape of gender and identity. In this up-to-date, comprehensive resource, Dr. Ehrensaft explains the interconnected effects of biology, nurture, and culture to explore why gender can be fluid, rather than binary. As an advocate for the gender affirmative model and with the expertise she has gained over three decades of pioneering work with children and families, she encourages caregivers to listen to each child, learn their particular needs, and support their quest for a true gender self. *The Gender Creative Child* unlocks the door to a gender-expansive world, revealing pathways for positive change in our schools, our communities, and the world.
