*Practical Plone 3* Alex Clark 2009-01-20 This is a beginner's practical guide that doesn't involve any code or programming concepts. You will learn by pointing and clicking on the options available in front of you. It includes easy-to-follow instructions and screenshots that will guide you through creating a powerful website. Each chapter stands alone and you need not go through all the chapters. You can pick and choose depending upon your requirements. If you want to get a Plone site up and running quickly and don't want to get involved in programming, this book is for you. This book is aimed at beginners, who want to configure and customize Plone to meet their content management needs. The book doesn't expect programming skills, although some knowledge of fundamental web concepts such as HTML and HTTP may be helpful.

2010-08-17 In front of you are the proceedings of the First International Conference on Electronic Government and Information Systems Perspective, EGOVIS. This conference builds on the tradition of its predecessors, the Electronic Government Conferences (EGOV) under the DEXA umbrella, which have been ongoing for nine years, but it also - cluded some innovations. In view of the large number of electronic government c- ferences, we found it important to focus the scope of the conference a little and to increase the quality requirements. Hence this year's conference featured a tougher review process and a smaller set of accepted papers. As a result, these proceedings contain the very best papers of 2010 covering various important aspects of electronic government and information systems used in the public sector. With an acceptance rate of less than 20% EGOVIS belongs to the top ten conferences in the world. The Program Committee accepted 13 full papers and 11 short papers, covering the most recent research trends in electronic government implementations, such as ICT for eGovernment services and monitoring, knowledge and content management systems for temporal and geo-spatial applications, interoperability for electronic government integrated architectures, decision and support tools for eDemocracy and direct parti- pation of citizens in the policy-making strategies, and Web 2. 0 and 3. 0 approaches for collaborative and transparent public sector services.
