Emerging and Advanced Technologies in Diverse Forensic Sciences Ronn Johnson 2018-09-07 An important contribution to the professional work performed in the areas on emerging technologies, this book provides an extensive expansion of the literature base on contemporary theories and investigative techniques used in the forensic sciences. Forensic science, as a relatively new field of research still actively identifying itself in the larger landscape of the sciences, has been sharply criticized for utilizing techniques deemed largely unscientific by subject area experts. This book presents a collective analysis and review of the existing challenges as well as directions for state-of-the-art practices found in diverse forensic settings, enabling the reader to make an informed decision about the scientific validity of forensic techniques, and emphasizes the need for a greater understanding of the use of the most appropriate methodology and procedures. The contributors address cutting-edge, developing, and even hypothetical techniques and technologies in forensics research and practice, especially as it relates to the sphere of criminal justice and law enforcement in contemporary society. A useful work for forensics professionals, and students and scholars working in the fields of politics and technology, criminal justice, forensic psychology, police psychology, law enforcement, and forensic science.

On the Other Side of Chaos Ellen Van Vechten 2018-12-04 Based in part on her own family's journey, Ellen Van Vechten explains the science of addiction, the theory of treatment, and the twelve-step model of recovery, providing sensible information and tips for reasoned action in support of a loved one while fostering personal growth and recovery. Powerlessness over another's addiction has a caustic effect on the family. Too often parents and partners equate "letting go" with "giving up." While acceptance of a lack of control is essential to coping with the disease within the family system, there is nothing passive about supporting a partner or child in their journey to recovery. This concept is the foundation of Van Vechten's original approach to empower individuals with knowledge, which when coupled with acceptance allows any family dealing with active addiction to make thoughtful and reasoned decisions to facilitate the recovery of both their loved ones and themselves.
