American History 1

W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States through his founding role in the NAACP, as well as internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. Black Reconstruction in America tells and interprets the story of the twenty years of Reconstruction from the point of view of newly liberated African Americans. Though lambasted by critics at the time of its publication in 1935, Black Reconstruction has only grown in historical and literary importance. In the 1960s it joined the canon of the most influential revisionist historical works. Its greatest achievement is weaving a credible, lyrical historical narrative of the hostile and politically fraught years of 1860-1880 with a powerful critical analysis of the harmful effects of democracy, including Jim Crow laws and other injustices. With a series introduction by editor Henry Louis Gates, Jr., and an introduction by David Levering Lewis, this edition is essential for anyone interested in African American history.

A Short History of Reconstruction, 1863–1877

John Bingham was the architect of the rebirth of the United States following the Civil War. A leading antislavery lawyer and congressman from Ohio, Bingham wrote the most important part of the Fourteenth Amendment to the Constitution, which guarantees fundamental rights and equality to all Americans. He was also at the center of two of the greatest trials in history, giving the closing argument in the military prosecution of John Wilkes Booth's co-conspirators for the assassination of Abraham Lincoln and in the impeachment of President Andrew Johnson. And more than any other man, Bingham played the key role in shaping the Union's policy towards the occupied ex-Confederate States, with consequences that still haunt our politics. American Founding Son provides the most complete portrait yet of this remarkable statesman. Drawing on his personal letters and speeches, the book traces Bingham's life from his humble roots in Pennsylvania through his career as a leader of the Republican Party. Gerard N. Magliocca argues that Bingham and his congressional colleagues transformed the Constitution that the Founding Fathers created, and did so with the same ingenuity that their forbears used to create a more perfect union in the 1780s. In this book, Magliocca restores Bingham to his rightful place as one of our great leaders. Gerard N. Magliocca is the Samuel R. Rosen Professor at Indiana University Robert H. McKinney School of Law. He is the author of three books on constitutional law, and his work on Andrew Jackson was the subject of an hour-long program on C-Span's Book TV.

There is an ongoing debate as to whether African American Studies is a discipline, or multidisciplinary or interdisciplinary field. Some scholars assert that African American Studies use a well-defined common approach in examining history, politics, and the family in the same way as scholars in the disciplines of economics, sociology, and political science. Other scholars consider African American Studies multidisciplinary, a field somewhat comparable to the field of education in which scholars employ a variety of disciplinary lenses--be they anthropological, psychological, historical, etc.,--to study the African world experience. In this model the boundaries between traditional disciplines are accepted, and researches in African American Studies simply conduct discipline based an analysis of particular topics. Finally, another group of scholars insists that African American Studies is interdisciplinary, an enterprise that generates distinctive analyses by combining perspectives from different traditional disciplines and synthesizing them into a unique framework of analysis.

Making America: A History of the United States

Introduction to African American Studies

MAKING AMERICA: A HISTORY OF THE UNITED STATES, BRIEF SIXTH EDITION, presents history as a dynamic process shaped by human expectations, difficult choices, and often the surprising consequences. With this focus on history as a process, MAKING AMERICA encourages readers to think historically and to develop into citizens who value the past. The clear chronology, straightforward narrative, and strong thematic structure emphasize communication over intimidation and appeal to readers of varied learning levels. The Brief Sixth Edition retains a hallmark feature of the MAKING AMERICA program: pedagogical tools that allow readers to master complex material and enable them to develop analytical skills. Every chapter has chapter outlines, chronologies, focus questions, and on-page glossaries (defining both key terms and general vocabulary) to provide guidance throughout the text; the open, inviting design allows readers to access and use pedagogy to improve learning. A wealth of images throughout provides a visual connection to the past, with captions that help readers analyze the subject of the painting, photograph, or artifact from an historical point of view. Investigating America gets to the heart of learning history: reading and analyzing primary sources. A new feature, In The Wider World introduces a global perspective for each chapter. In addition, a new map program provides clear, visually engaging maps with

Central America

In this important book, Nicholas Hartlep and Daniel Scott's detailed analyses on both visual and historical representations of Asian Americans in textbooks and teacher manuals used in our elementary and secondary schools poignantly tell us that generations of children are growing up being fed this single story about Asian Americans. As Hartlep and Scott write. Asian Americans have once again been constructed as the good minority that can succeed on their own and be used as a political instrument to shame the Blacks for their underachievement and their fight for equality. Over and over again, the media has been telling a single story about Asian Americans to the public for the past fifty years. The consequence of this fabricated story is that it discourages others, even Asian-Americans themselves, from believing in the validity of their struggles (Linsli, 2014, p. 1).

America, Past and Present

Central America is undergoing an important transition. Urban populations are increasing at accelerated speeds, bringing pressing challenges for development, as well as opportunities to boost sustained, inclusive and resilient growth. Today, 59 percent of the region's population lives in urban areas, but it is expected that 7 out of 10 people will live in cities within the next generation. At current rates of urbanization, Central America's urban population will double in size by 2050, welcoming over 25 million new urban dwellers calling for better infrastructure, higher coverage and quality of urban services and greater employment opportunities. With more people concentrated in urban areas, Central American governments at the national and local levels face both opportunities and challenges to ensure the prosperity of their country's present and future generations. The Central America Urbanization Review: Making Cities Work for Central America provides a better understanding of the trends and implications of urbanization in the six Central American countries -Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua and Panama- and the actions that central and local governments can take to reap the intended benefits of this transformation. The report makes recommendations on how urban policies can contribute to addressing the main development challenges the region currently faces such as lack of social inclusion, high vulnerability to natural disasters, and lack of economic opportunities and competitiveness. Specifically, the report focuses on four priority areas for Central American cities: institutions for city management, access to adequate and well-located housing, resilience to natural disasters, and competitiveness through local economic development. This book is written for national and local policymakers, private sector actors, civil society, researchers and development partners in Central America and all around the world interested in learning more about the opportunities that urbanization brings in the 21st century.

**Central America Urbanization Review**

This volume deals with two momentous and interrelated events in American history. The American Civil War is the country's largest and most significant war, as northern victory created national sovereignty and ended legal slavery. Reconstruction, although intricately linked to the Civil War, has a more complicated and darker legacy. During this era, the U.S. government undertook a limited effort in behalf of black citizenship, and faced with violent resistance from white southerners abandoned the effort. Emancipated and enfranchised after the Civil War, African Americans contributed to the economic, social, and political Reconstruction of the South only to see their efforts come to an end due to southern white resistance and northern indifference. This reader provides students with a collection of more than sixty essential documentary sources for these periods, including presidential addresses, official reports, songs and poems, and a variety of eyewitness testimony concerning significant (and often dramatic) events. Contextualizing headnotes explain the importance of each document. Harrold's introduction includes an explanation of how historians analyze, contextualize, and interpret a variety of primary sources related to the Civil War and Reconstruction, allowing students to acquire a better understanding of the raw materials with which historians create narratives of the past, and making this volume a valuable supplement to a variety of courses.

**Exploring America**

The Government must show how the excellent medical care being delivered to injured service personnel will continue long after the memory of the Afghan Operation fades. This report, which gives praise to the first class medical treatment provided for the Armed Forces, questions whether the support for injured personnel will be sustainable over the long term. In particular, the committee is concerned about the number of people who may go on to develop severe and life-limiting, physical, mental health, alcohol or neurological problems. There is still a question mark over whether the Government as a whole fully understands the likely future demands and related costs.
